

EXTENDING KNOWLEDGE
EMPOWERING WOMEN

“ I feel like Annie’s Project **gave me the skills I needed** to be able to increase my profits as the years go with the crop I’m growing. ”
—Lacy, Odebolt, Iowa

What is the Women Managing Crops course?

Women own 47% of Iowa farmland (Duffy 2012.) Whether these landowners farm the acres themselves, or lease out their land to other farmers, they are taking on increasing managerial roles. Other women are not land owners, but find themselves taking on many crop production roles. Still other women in rural Iowa just want to learn more about typical agronomic production and Iowa’s soil and water. This four-session course is designed for women of all ages and experience levels who want to know more about the key agronomic decisions for corn and soybean production. The sessions take a seasonal approach and cover decision-making for pre-planting, the growing phase, and harvest.

www.aep.iastate.edu/womeninag

At the end of four weeks, participants will know more about:

- **Pre-planting**
 - ▶ Seed selection
 - ▶ Plant population
 - ▶ Spring tillage practices
 - ▶ Crop insurance
 - ▶ Marketing strategies
- **Growing**
 - ▶ How plants use N-P-K
 - ▶ Nutrient management
 - ▶ Field scouting
 - ▶ Pesticide/herbicide application
 - ▶ Marketing strategies
- **Harvest**
 - ▶ Timing of harvest
 - ▶ Harvesting practices
 - ▶ Storage and drying
 - ▶ Fall tillage practices
 - ▶ Marketing strategies
